

The worlds First patent pending Bed Bug Barrier

An extremely simple, effective and low cost solution to bed bug infestations.
No need for toxic chemicals Environmentally safe and friendly.
Simply attach the bed bug castor barriers to the bed legs and create
an impassable barrier between the bed and the bedbugs.

How it works

The bed bugs crawl up into the unit and are stopped by an impassable barrier of glue which lasts for years and is safe. The glue is non toxic, made from oil and tree resins.

Supplying the future of pest and weed control
