

Sabre

Tabletop insect control

BRANDENBURG
UK Limited

Sabre

The SABRE is a uniquely stylish insect control unit suitable for the home, office or restaurant.

Utilising the scientifically proven power of ultraviolet light to attract flying insects the Sabre uses a specially formulated glue board to retain insects for disposal.

The unit is fitted with a 9W compact fluorescent bulb that is easily changed. In addition, the shade is designed either in an elegant polished stainless steel or from a patented translucent material that is both light enhancing and stable under UV light.

There is simply no more stylish product around, and best of all it is backed by the Brandenburg reputation for high performance flying insect control performance.

APPLICATIONS

Take-aways | Shops | Offices | Homes
